

March 6, 1957

Dear Dr. Stenzel,

~~Have~~ just ~~learned~~ ~~of~~ your recent illness and wanted to drop you a line to let you know that our thoughts and prayers are with you at this time.

Unfortunately, I have been unable to find any details as to your condition, but I certainly hope that this finds you better.

Needless to say many people were shocked and disgusted with the unpleasant situation that you were placed in at the University of Houston. You may be certain that the University has lost considerable prestige and support among the geological profession.

If I get over to ~~the~~ Houston any time soon I will definitely get out to see you. In the meantime put up the good fight and remember you have countless friends behind you. Sincerely, Bill Matthews <sup>Lamar College</sup>
