AIR MAIL

Doctor J. Sornay
Muséum National d'Histoire Naturelle
Institut de Paléontologie
8, Rue de Buffon
Paris-V, France

Dear Dr. Sornay:

Thank you very much for your letter of March 10 and the package of fossil oysters, which arrived safely. I hope you will be on the lookout for more of the oyster species which are needed.

By separate mail I am sending you a package of 85 specimens of Baculites taylorensis Adkins, 1929, from the Pecan Gap Chalk, Late Campanian, of the vicinity of Austin, Texas. All these specimens are topotypes. In the near future I shall have more ammonite material to send to you.

With my warmest regards,

Sincerely yours,

H. B. Stenzel
