Dear Dr. Stenzel:

This is to acknowledge the reprints of three Eocene papers by yourself (one with Dr. Turner), which you sent to Prof. Harris.

Prof. Harris has left for Alabama and Louisiana for more Eocene work. I know he will be pleased to have received your papers. He sent you a copy of his recent Science article just before he left.

You are to be congratulated on these papers. We are particularly interested at present in the Yegua and Jackson problem.

Would it be possible for you to send me separates of these three papers as I need them at once in my work? I intend to send you a copy of the Jackson gastropod work when it is done.

With best regards,

Yours truly,

*Katherine U. W. Palmer*
