Museum of Paleontology
Ann Arbor, Michigan

Dear Lew:

Thank you for sending me copies of your various old and new publications. I am always interested in them.

I am still going strong on oysters, both living and fossil. The results are quite good and seem to astound the oyster biologists very much. I am working in cooperation with some anatomists now. We are getting good anatomical definitions of the various genera based on shell characters.

With best wishes for the New Year.

Sincerely yours,

H. B. Stenzel
