Dear Henryk:

We appreciate your letter of April 25 very much and are happy to hear that you anticipate being back to work so soon. I imagine there will be an interval when you will have to take it easy, but then the time will come when you can do about as you please. Mrs. Adlof you remember had a severe attack many years before she died and after the initial period of being careful did any thing and every thing that she wanted to do without ill effect.

Thank you very much for your good words about Virgil. He is a very satisfactory son. I don't know if you have heard or not, but he is being married the 9th of June to a Radcliff girl. Both get their degrees on the 13th of June, hers is in biology. We are driving up for the two events picking up Louise at Vassar on the way. We hope to make a trip to New Brunswick and Quebec afterwards, but I have to interrupt the trip almost a week in order to attend a conference and give a paper on tektites in Washington June 17 and 18.

You must be proud of Sonya for her achievements in medical school and I imagine Yetta is measuring up to the accomplishments of her sisters. You are nearing the end of the long road that one must follow to educate their children. We still have 7 years to go, but at least within the month we will have passed the Junior High School stage. Milla has been president of the P. T. A. there this year, and next year is looking forward to sitting on the side lines and let some one else do it.

It was so thoughtful of you to offer to write your friends in Cambridge about Virgil being there for the next two years. We will be delighted to have you do so, and I am sure Virgil will too. Thanks very, very much.

We are happy to hear of your progress back to health and hope that you rapidly continue to improve. Please take care of yourself. Again many thanks for your kind letter.

Sincerely,  
Mildred and Virgil  
Barnes
