Professor Raymond C. Moore
c/o State Geological Survey of Kansas
University of Kansas
Lawrence, Kansas

Dear Ray:

What is to be done about Præostreidae KRIZ, 1966, p. 28
and Præostrea BARRANDE, 1881? See enclosed ~~xxxx~~ pages of article *reference*
by ~~Kriz~~.

Kriz has had the best materials available. Therefore, his interpretations are likely to be better than others, although not necessarily correct. For this reason I propose to write up the family Præostreidae from his article. It would require about 1 or 2 pages of the Treatise and should be inserted in the Mytilacea. The chapter on the "Oysters" would require changing as follows: on p. 143 (see manuscript in your office) after "Præostrea Bohemica BARRANDE, 1881" insert "see p. Nxxx" and delete the rest of pp. 143-144. The work would not take much of my time. What say?

Sincerely,

H. B. Stenzel
