

6 Rolla Gardens,  
Rolla, Missouri,  
April 30, 1950.

Dr. Henryk B. Stenzel,  
Bureau of Economic Geology,  
University of Texas,  
Austin 12, Texas.

Dear Henryk:

As you may know, there is an opening for a micropaleontologist-paleontologist-stratigrapher to succeed Dr. Galloway at Indiana -- and I think that I have an excellent chance for the position. Dr. Deiss wants letters of reference from "colleagues" and "administrators" who have been associated with me at my various places of employment, to reach him not later than May 8th. I should be most appreciative, therefore, if you would write to him in that regard. (I am not resigning in a fit of pique or anything like that here -- in fact, had the pleasant surprise of notification of a \$300 raise for next year. However, Rolla is not the situation that Harriet and I want for the rest of our years, and the job at Indiana seems tailor-made for our interests. That is especially so in the light of their interest in continuing Dr. Galloway's work on foraminifera.)

We trust that you have rested up from the rigors of the meeting. I weakened appreciably, and left on the last day of the meeting. It was high time, as I developed a fine nervous indigestion on the St. Louis to Rolla lap of the train trip. Harriet and I enjoyed the visit with you folks, but hope that you can visit us at home in more leisurely fashion some time.

Must close this, as there is much correspondence requiring attention (I do not know why mail arrives at such an accelerated rate when one is away from the campus for a few days!), and we must get the house ready for a visit from Harriet's father -- who may arrive at any minute!

Harriet joins me in all regards to you and Elsie and the young-uns, and I thank you in advance for whatever help you can give in the Indiana matter.

Sincerely,

*Don L. Fuzgell*
