Dear Henryk:

Many thanks for your informative letter.

It is indeed fine that Mrs. Plummer can really turn her efforts to micropaleontology. It is to be regretted that she must spend the time on the Rolshausen project. It is interesting to have this dope on type localities, but not many will use it. The classical localities rate it.

I grant you the Coleites-Palmula Marysville Butte problem is of no great import, but it is an interesting example of self-hypnosis.

I was rather amazed at Dana Russell's election. I thought there were enough L.S.U. graduates to likk him. However, he has improved greatly with the years. Paleontologists seem to be a dying race, which makes it nice for us old fellows. They have to keep us in harness. If worse comes to worse, give the Journal to the P.S.. Personally I always felt we should unload the J.Sed.Pet.. Your finances sound good.

It is gratifying that your course has gone over so well. I note the boys around here are above par too. It is probably due to the few added years. Fortunately for me, I had to compete with a rather comparable group back from World War I. They certainly stepped up the competition.

I am sorry to see you loose Frizell. I know of no one out here, who might be interested. Stanford is interested in getting a man, but it is not too clear whether he could hang on if Schenck returned. I gather Stanford thinks he should either come back or resign. You had better waive the Ph.D. and maybe the 50 years. M.B. Stephenson wouldn't be so bad. He should have had his degree. Believe dept. politics ruined him.

Let not the great Fisk worry you. We can torpedo him if necessary. He didn't know when to quit projecting his terraces.

Hope something good turns up for you. I don't think this would be

a good spot. The Tertiary collections have been neglected since Woodring's departure in the far dim past.

Yours was the first news of Scotty's passing on. While I hate to see him gone, so long as he could not recover, it is best that the agony be ended. I have always considered him to be one of the very few men entitled to be called a Christian. He so lived.

Will appreciate receiving the Vol. 1 of Strat. of Texas, and please see I get new notices. May be able to keep up to some extent. Want to anyway on the Cret. and Tertiary.

Today is more like San Francisco, a low drizzly fog.

Let us carry on!

With very best wishes,

Morse

In spite of his high honors, Stock still talks to me
