Dear Doctor Stenzel:

Thank you very, very much for the Leon County report. It recalled happy days and pleasant anticipations of laboratory work on the fossils collected on that trip. I've had this list for you ever since the first week of my return but I gave it to some W.P.A.s to check which they presumably did. In glancing over it, as I put it in the envelope, I caught a mistake on the first page and held it thinking I'd have time to go over it myself but I never have. But I must express my appreciation of the Leon County report. It is a mighty fine piece of work and will establish a check for all of east Texas. Of course, I turned first of all to the Yegua. It is a problem that can't be worked out, I am afraid, in Leon County and I think you were very wise to side step it. You have heard doubtless of Mr. Mansfield's sudden death. An association of almost 20 years came to an end when he died. He was a mighty fine person to work with and I shall miss him terribly. The page proof of a Florida report came in 2 days after his death and I took care of that. He left some other work that can be sent on with a little editing and I shall do that. Remember me most cordially please to Mrs. Stenzel and the little girls and to your aunt.

Yours very sincerely,

Lucia Gardner
