Dr. F. E. Turner
Geology Department
A & M College
College Station, Texas

Dear Dr. Turner:

Please find enclosed two sample cards of the card catalogue. I hope you like them. These two cards with the necessary figures have gone to The Meriden Gravure Company to be printed as prospectus cards. Presumably, they will be ready for the G. S. A. meeting here in Austin where I would like to exhibit them. The project is finally going through. Dr. Sellards decided that the Bureau will take over all the costs of printing. We have the following cards ready to go:

nautiloids	28 species on 43 cards
cryptocardia and lapparia	12 species on 12 cards
turritellidae	81 species on 81 cards
brachiopods	27 species on 28 cards

I hope to get around to sending the separates out very soon. I believe now is a better time than earlier in the summer any how.

With best wishes,

Cordially yours,

H. B. Stenzel, Geologist
