Glasgow, W.2.

22nd October, 1963.

Dear Dr Stenzel,

Thank you very much for your letter. I am so glad you got the copies of my papers and I look forward to receiving the specimens of Exogyra arietina which you have kindly sent. I will write further about these when I see them.

I am glad you think I was of some little help to you and I certainly enjoyed our two long discussions at Washington.

With regard to my travels in January, I am going on from Jamaica to Miami, probably about January 14th or 15th and could go on to Houston at the end of that week. I am due at Princeton on the Sunday (January 19th), so if the invitation does come from the Shell Development Company it might be possible for me to accept it.

Quite recently I had the interesting experience of visiting the last natural bed of Ostrea edulis in Europe which is commercially exploited. This was in northern Spain.

With all good wishes,

Yours very sincerely,

Professor H.B. Stenzel,  
P.O. Box 481.  
HOUSTON 1, Texas.

Sender's name and address: Professor C.M. Yonge,  
Zoology Department, The University,
