Canada

Dear Sir:

I have read with great interest your recent paper, "Contacts of sedimentary formations: A resumé", because it discusses certain ideas and problems in which I have been interested for some time. Curiously, your paper parallels in many ways a paper I published seven years ago, but which must have escaped your notice because it is printed in a local society guide book. The paper is "Boundary Problems": Mississippi Geological Society, Guide Book, Ninth Field Trip, September 26-27, 1952. I am sorry I do not have any more copies of the paper, hence cannot send you one. However, it may still be available from the Secretary of the Society.

Very truly yours,

H. B. Stenzel
