Dr. H. B. Stenzel
Department of Geology
A & M College
College Station, Texas

Dear Stenzel:

This will acknowledge receipt of your letter of August 20th and I have been delayed answering it due to the fact that I have been away for the past two weeks. Thank you very much for identifying this coral.

I was in hopes that we would be able to make the field trip to Smithville before College opened, but due to my recent absence from the office it will probably not be feasible for me to take you over in this country for awhile. I shall look forward in the near future to such time as convenient to both of us to taking you to Bastrop County to visit the main collecting places.

Under another cover I am mailing you a sample taken from a shallow well in Duval County. The material is not distinctive as I know you should like to have it, but are you able to advise me whether this material is Claiborne, Jackson or younger? Any suggestion as to the specific age of this rock will be greatly appreciated.

I trust that you have had an enjoyable field season and have gotten your work in Leon County well in hand.

Very truly yours,

B. Coleman Penick
