Mr. J. Duncan
A-12-D CV
College Station, Texas

Dear Mr. Duncan:

On returning from a trip to Delaware I found your note and the fossil waiting for me. The fossil is a concretion formed around a Belosepia phragmocone, that is, a fossil squid cuttle bone.

Do you remember from which layer you collected it at Stone City? I am interested to know. There are some pieces missing, particularly the nose or point of it. Is it possible for you to go back to where you found it and pick up the remaining pieces if there are any?

With best wishes.

Sincerely yours,

H. B. Stenzel
