USSR.

Dear Dr Stenzel:

I am in a hurry to thank you on the very interesting publications you send me. For my part I am posting to you some of my prints. I am very fond ~~that~~ our scientific connections had begun. Perhaps you have a reprint of your earlier article "Nomenclatural synopsis of supraspecific groups of the family Ostreidae" (Journal of Paleont., vol. 21 N 2, 1947) in which you are discussing also my new genera and subgenera of Ostreidae. I should be very glad to have this paper.

These last years, especially after the journey to Antarctica, I have to deal very little with oysters. To day besides the problems of regional geology, cretaceous and lower-tertiary stratigraphy and paleoecology I am very much interested with different Problematika.

With best wishes

yours very sincerely

O. Vialov
