Dr. Wayne V. Jones  
Tide Water Associated Oil Company  
Houston 1, Texas

Dear Dr. Jones:

In response to your inquiry of October 13 about Mr. John H. Danto, Mr. Danto has worked for me as part-time assistant sometime ago. He has had the usual preparation in geology and in addition he has been interested in doing some original work in certain specialized lines in paleontology. Recently he has worked for the Ground Water Branch of the U. S. Geological Survey doing field work. He is a reliable person of good character and attractive personality. He should be able to work in a group. He has been tenacious in following his specific lines of interest and if he shows as much interest in his work with your company, he should make a good man. However, he is somewhat awkward in his work. I recommend him seriously for your consideration.

With best regards,

Very truly yours,

H. B. STENZEL  
Geologist
