EDUCATIONAL MATERIAL

January 5, 1959

Dr. H. B. Stenzel,
 3726 Colquitt,
 Houston 27, Texas

My Dear Henryk:

In reply to your card of December 30 I am sending, with my compliments, a copy of Bulletin 86, Mississippi Mineral Resources. I hope that you find it is worth having in your library.

As you know, the Mississippi Geological Survey, under its reorganization, has adopted a policy of making nominal charges for all of its publications, in order to help defray the cost of these publications. I expect that the Survey has issued a price list, but in case it hasn't, and you or anyone else wishes to have another copy of this bulletin the price is \$1.00. The Survey Board recently passed a resolution awarding 20 complimentary copies of a work to its writer, but as you know, these don't last very long.

I thank you for the honorary "Dr." you bestowed upon me, but I assure you that, even though I would have liked very much to have had such a degree, I never earned one, nor do I expect ever to be given one. Commercial work more or less renders that a nearly unattainable goal.

I will never forget the Presidential Address you gave in Chicago on the Claiborne beds of Texas. I thought this was the zenith of achievement in the application of meticulous paleontological analysis and sedimentational principles to careful stratigraphic work!

Kindly give my regards to your daughters. With kindest personal regards and every good wish, I am

Sincerely your friend,

FFM:se
