Dr. F. E. Turner
Department of Geology
A. & M. College
College Station, Texas

Dear Turner:

I believe you have our Turritella index cards. It seems that I will have enough time during the summer to work on them and to finish their preparation. Could you be so kind as to ship them over here? Toulmin's paper is very nice and I am glad to be able to include it with the brachiopod index cards. Could you ask him to be so kind as to let me have two reprints and, if possible, the original photographs for his plate. One could, of course, use the plate out of the bulletin but there would be some loss in reproduction. It is preferable to have the original photographs.

The Bureau Contributions are going to appear the end of this month or early in June. The first part has already been finished. I believe it will be a very fine bulletin.

What are you going to do this summer?

Sincerely,

H. B. Stenzel, Geologist
