

August 4, 1970

Miss Josephine Casey
Administrative Assistant
Bureau of Economic Geology
University of Texas
Austin, Texas

Dear Josephine:

Would you please have the kindness to send a courtesy copy of all the cards of the Catalog of Type Invertebrate Fossils of North America to Professeur Jean Roger, Laboratoire de Paleontologie, Universite de Paris, Faculte des Sciences d'Orsay, Orsay, France. You might add a note that I am responsible for this exchange.

The Oyster Volume of the Treatise on Invertebrate Paleontology has just gone to press at the University of Kansas. It ought to be about 300-400 pages thick. There is 20 years of intermittent work involved.

Best regards,

Sincerely,

H.B. Stenzel
Consulting Professor
