Mr. H. B. STENZEL
Professor of Geology
University of Texas
AUSTIN
Texas U.S.A

My Dear Mr. Stenzel ,

I was very satisfied of reading good news of you in your letter of February 6th. I will not forget , in the future , to send you the copies of my publications , and you will , please , find in the enclose two small works that appeared lately .

My great work on the " Geologie de Paris " will be , in principel , printed by the "Service de la Carte Géologique de la France " . Credits affent to it have been accepted , and I shall remeet the manuscript at my retourn from Marocco at the beginning of May .

As you want , I add to this letter the list of french Geologists & Paleontologists which would be very interested with your works , and could exchange their papers with your owns .

I have not seen M. Morellet since some weeks ; he his not presently in good health , but , at first opportunity , I will repeat my desire , for the sending his book to you .

With best regards

Very sincerely yours

R. S. Sneyers
