

17 December 1957

Professor Emmett Bennett, Jr.
Box 1978
Yale Station
New Haven, Conn.

Dear Emmett:

Mr. Blegen has asked me to keep the three rolls of microfilm at the School for the time being, and he will consult Mr. Karouzos about the ultimate disposition.

Could you send me a word of explanation about the "concordance." I do not understand the system, and Mr. Blegen is unable to enlighten me. How does one go from the list to the picture (e.g. with "Un2: z1 (a7, g19)" how do I find the corresponding frame? And conversely, looking at the pictures how may I find the number of the tablet? Sorry to be dull about this; but somebody here had better know the process.

Yours,

John L. Caskey
