Dr. R. Weijnschenk, Geolog
Prins Hendriklaan 17
Oegstgeest, Holland

Dear Doctor Weijnschenk:

Thank you very much for your letter of November 14, 1950,
and the separate on the "Die Jura-Mikrofauna und - flora des
Sonnwendgebirges". The errata also arrived safely.

I have not had any opportunity to study your work, because
I am busy with geological field work and am out of town most of
the time. However, I am looking forward to reading your latest
work.

At present there are no openings here in research insti-
tutions.

With many thanks,

Sincerely yours,

H. B. STENZEL
Geologist
