

September 25, 1940

Professor G. D. Harris
Department of Geology
Cornell University
Ithaca, New York

Dear Professor Harris:

Your recent article in Science has interested me greatly, and I would appreciate it if you were to send me a reprint.

I am sending you by separate mail my recent publication on the Yegua problem which was published June 12, 1940. This article also treats with the Gosport problem in detail. It is evident from the article that I share your views.

Sincerely yours,

H. B. Stenzel, Geologist
