Thank you very much for your letter. I am extremely grateful. I am much happier about Eo 444 and En 654, particularly because of the autopsy of  $\bar{\Pi}$ !! and the parallel for the addition. I now think that the 14<sup>th</sup> Terera <sup>may have been</sup> ~~was~~ Pegora on the ground that he alone of the three Eo candidates (Pegora, Parako, Taring) is taken across into En. But I hope soon to send you a proper defence of Demeter! This is really only to say thank you. With best wishes
