

April 20, 1954

Dr. Horaco J. Sawin
The University of Houston
Houston, Texas

Dear Ned:

Sorry to have missed you. We were unable to make it earlier than that. I suppose most of the discussion can be settled by letter. So here it goes.

One of my students here wishes to transfer to the University of Houston for graduate work and take his master's there. He is going to write you. He stated his father would support him for one year if his wife want to work too. Supposing you see what can be done for this fellow.

Perhaps I should have made previous arrangements to meet with the geology staff, but after all it was their holiday. I would have liked to discuss departmental matters with them, but could not locate them at the last minute. Well next time we will try to do better. The chief matter to discuss is probably class assignments. Probably for September 1 I should plan on teaching one section of 141 and 462 if agreeable with everyone. Sooner or later one will have to look into 141 anyhow and this may be the first step. The text book I suggest for 141 is Leet & Judson; no text book for 462.

If it is possible to do so, there should be available in our library a complete set of the publications of the Paleontological Research Institution, list of which is enclosed. They are needed for Geology 462. For your information I am enclosing a list of the books accessioned to the Geol. Library, University of Texas, from February 1 to March 31, 1954.

We talked to Dean Homer Richter at Rice. A very nice person. Rice has a 4-year premed course. Too long for Sonya, the impatient kid.

Best regards,

Sincerely,

H. B. Stenzel
