

June 9, 1951

Mr. F. Stearns MacNeil
U.S. National Museum
Washington 25, D. C.

Dear Stearns :

T. H. Withers wrote me recently and asked about the stratigraphic horizon of Zehnstolepas americana Withers from "Claiborne formation of Fugh's Branch of Satilpa Creek, Clarke Co., Ala." and "Claiborne, Ala." Is there any way to know from which formation it came?

Best regards,

Sincerely,

H. B. Stenzel, Geologist
