

Dear Miss Kober: best thanks for your letter of Apr. 30, that reached me just now. I'm sending you some reprints of mine of which I still have spare copies. I've put your name on my mailing list for whatever I may publish in future. I'm looking forward to your reprints, hoping they'll reach me soon. I'd like to get also those which you said to be not significant, if you can let me have them. My friend Giovanni Pugliese Carratelli lives in Naples: viale S. Anna all'Arenella 1, Vomero, Napoli. I've already told him to try to help you, but I know he has no spare copies of his monograph left. Please don't hesitate to write me for whatever you may need here! I'm delighted to have got in touch with you and hope to be of some use to you, specially now that connections with foreign scholars are so difficult. I should like to have Blegen's article on the Pylos tablets (A.J. Archaeol.) as well as: G. Sarton, Minoan Mathematics, in "Isis", XXIV, 1936, p. 375-381. Could you get them for me and tell me what I can send in return? No doubt I will deal with your articles in the near future and let you have a copy

CARTOLINA POSTALE

of my comments. Please
remark I have changed
my views since the pub-
lication of "Minoica"
and have discontinued
that series of articles.
Meanwhile, with best thanks
and regards, I remain, Ma-
dam,

Yours sincerely,

Emilio Peruzzi
