Dr. H. B. Stenzel
Bureau of Economic Geology
Austin, Texas

Dear Dr. Stenzel:

As a part of a symposium to be presented at the Fort Worth meeting of the SEPM, I am wondering if you would prepare a paper on the contribution that stratigraphy is able to make to the discovery of petroleum. Your paper should be ten to twelve minutes in length.

I would be glad to have your consent at your earliest convenience.

Cordially yours,

W. H. Twenhofel
