GEOLOGICAL SURVEY  
WASHINGTON 25, D. C.

9 February - 1948

Dear Dawson Stewart -

Thank you very much for your pleasant note of welcome. I'm afraid you haven't had time for much geology of your own choice these past few years. I hope you have a copy of 142-G. The author's reprints were sent me while I was in Japan, just why I don't know. I did not bring back any of them, and have had the greatest difficulty in getting hold of a copy for my own use. Please remember me most

cordially to Mrs. Stenzel and your daughters. They must  
be very tall now. That was a mighty pretty Christmas  
card you all sent me.

Sincerely yours,

---

Luis Gardner
