Gentlemen:

I have found here two collections of marine shells; one from Point Isabel, and one from Galveston. I would like to know who would be willing to identify these shells for us. We would be willing to give the person a certain part of that collection in exchange for that service; however, I will have to remark that these collections were made by inexperienced people and are chiefly beach worn material. I presume somebody would be interested in checking the ranges of species from such collections. I would appreciate any information you can give me concerning this matter.

Very sincerely yours,

H. B. Stenzel
Geologist
