AIRMAIL

Professor Raymond C. Moore  
Geology Department  
Kansas State University  
Lawrence, Kansas

Dear Ray:

Enclosed are pages 1-199 of the "Oysters" and three bound books containing literature references for these pages. The literature references have been checked against the text several times and should be reasonably complete. Missing are two references, namely: Krauss, 1843, for pages 171 and 175, and Kriz, 1966, for Praeostrea on page 143. Perhaps you can find Kriz, Jiri, 1966, On Praeostrea Barrande, 1881, Natl. Muz. Praha, Czechoslovakia, Casopis, Oddil. Prirodoved, V. 135, no. 1, pp. 25-42, 2 pls. It is not here in Houston, Krauss, 1850, is incomplete because I have been unable to borrow the book.

What happened to Lithiotis? Is it to be included here or has it been placed elsewhere? There was some discussion of that with Dr. Cox several years ago. I do not know what the final word was on that genus.

References pertaining to illustrations and illustration legends are not yet available. The same is true for those needed in the remainder of the chapter on "Oysters." Only a few of them are in the three books.

On ms. page 145, bottom, several genera are listed with their family assignments, please check the other authors to see whether the assignments are correct on page 145. I am prepared to accept their assignment.

With best regards,

Cordially yours,

H. B. Stenzel
