

June 4, 1965

Dr. Norman D. Newell
The American Museum of Natural History
Department of Fossil Invertebrates
Central Park West at 79th Street
New York, New York 10024

Dear Norman:

Thank you for your letter of May 28. There are two persons here (Bob F. Perkins and Otto Majewski) who would like to meet you and may have data that will interest you. Bob has been working on rudists for several years and is far ahead of other rudist specialists. Otto has been helping me with shell structures of oysters and has some very interesting peels on hand. When you are here in Houston, I shall try to make the necessary arrangements for a get-together. I do not think it is a good idea for us to get together on June 17 in the evening. You probably could use that evening for a rest.

Yes, Galtsoff's book on oysters is here. I am glad it is out and available for use. Galtsoff and I have been corresponding about it for a few years before it went to press.

Sincerely,

H. B. Stenzel
