25 July, 1931

Dear Doctor Stenzel:

I was sincerely delighted to see your name in science this morning among those who had received grants-in-aid for the coming year. Mr. Keith left Washington just about the time that I arrived so I had not been able to learn just what happened. Will you be able to publish your "Weches" fauna shortly? I am very much interested in seeing that excellent paper in print. With my hearty good wishes for the summer's field work,

Very sincerely yours,
