

MONTANA SCHOOL OF MINES

BUTTE

Dear Dr. Stenzel,

Mrs. Plummer mentioned in a recent letter that there is a possibility that you may visit another Weches outcrop south of Austin during the Xmas holidays... during the convention, to be exact... and that I might be able to tag along and collect some samples.

I will appreciate the opportunity to go into the field with you again, especially to sample another section of the Weches. I am anxious to determine the relationship of the fauna at another locality. Please do not go to any extra effort as I know you are so busy, especially with G.S.A. in Austin during the holidays. If you can conveniently make the trip, I would certainly like to tag along. I will drop by to see you on my arrival in Austin.

Best wishes for a very merry Xmas,

Sincerely,

Don Ferry
