24th February, 1959.

Dear Dr. Bennett,

I have your post-card dated 2nd February, 1959. Since you appear disposed to treat my questions rather lightly let me try to make clear what the situation is. In several of your publications you make statements for which the authority is not immediately clear. When I come across such a statement I endeavour to discover what its basis is in the texts. When, as not infrequently happens, I can find no adequate authority or reference I ask you to provide me with additional information. You may think these questions unnecessarily troublesome and you may not be inclined to answer them directly. Nevertheless they are intended to give you an opportunity to explain the basis of your beliefs and theories. If you provide this information I should be glad to take account of it. If you refuse to provide it I shall draw my own conclusions from such evidence as is now available to me. I would suggest, therefore, that you have nothing to gain by fobbing me off with vague statements to the effect that the evidence is to be found in "published and standard works." I ask you to reconsider my inquiries about sign 89 in this light.

You asked me sometime ago to let you have a copy of my M.I.O. article and I told you then that my supply of copies was exhausted but that I would send you a copy as soon as I obtained one. The situation remains as it was before. I have no spare copies but you will receive one as soon as possible.

Yours sincerely,

Dr. Emmett L. Bennett, Jr.
