University Park
Los Angeles 7, California

Dear Dr. Hartman:

I am very glad to have been able to visit with you in Los Angeles. Your collections and explanations were very instructive and I appreciate greatly the time you have taken to explain the material to me.

By separate mail I am sending you two species of the genus Tubulostium, about which we were talking. Is it a gastropod or is it an annelid? Can you by any chance place it with similar recent material?

With best personal regards, and thanks.

Sincerely yours,

H. B. STENZEL
Geologist
