Houston 6
Texas

Dear Henryk:

Your letter of the 22nd contained news that gave me a great shock. I am pretty much out of circulation and I had not heard of the heart attack. It is awfully good news to hear of your recovery and I do hope and pray that you will look after yourself properly and do everything the doctor tells you to do. I recommend that because I have followed orders and he says that I am slightly better. Your profession values you because of your exceedingly fine work and we want you to continue.

No, I have not received a copy of the University of Texas Publication 5704, but I will enquire of our library to see if they have one. However, we are so short-handed that it sometimes takes six months or even more for a publication to reach us.

Your new work should be interesting and fruitful, and doubtless much less of a strain than University teaching.

Sincerely yours,

Hubert G. Schenck
