Dear Emmett,

About the time the Harvard Studies in Classical Philology was ready to go to press the editors wrote me and asked me if I would consider publishing my results on the Enkomi tablet in their publication. They gave me carte blanche on needed time and so I was only too glad to consider them. The article will appear in the volume now in press.

At Cincinnati you told me that a volume was to appear comparable to your Pylos T II (was it?) but on Linear A (I messed that sentence up, didn't I?). I may have misunderstood you but I haven't noticed such a volume. At any rate, since I have never seen any Linear A except the one or two examples used in books, ~~of it~~, and since if I am to have any material at all on it I must buy it myself, and funds are limited, what volume or volumes would you advise me to buy to get the most for the least money? I shall be grateful for such advice.

Marguerite joins me in sending regards.

Sincerely,

Henry Epler
