

Geology Dept.

June 20, 1955

Dr. William S. Levings
1817 Arapahoe
Golden, Colo.

Dear Dr. Levings:

Our department here at the University of Houston would like to have a professor to teach the geological side of geophysics, that is, chiefly interpretation of data. We would like to have someone who has been in petroleum work and knows geophysics as used by the oil industry.

With your wide experience in this field, I thought you might be able to suggest a competent person. Needless to say, I would be very grateful to you for suggestions.

With best regards.

Sincerely,

H. B. Stenzel
Chairman
