Dr. H. B. Stenzel,
University Station, Box B,
Austin 12, Texas.

Dear Henryk:

I enclose the following from my Post-Cretaceous Correlation Committee files (A.A.P.G.):

1. Mimeographed notes: "Standardization of Gulf Coast Tertiary & Quaternary . . Names etc." Keep
 2. Chart (& blue-line copy) South Texas District, So. Tex. Geol. Soc., Correl. Comm., July 23 '43 Keep copy
Return
photostat.
 - Chart
 3. Post-Cretaceous Stratigraphic Divisions in S.W. Tex. & Rio Grande Embayment, Sandige, and Houston Comm. amendments, Jan. 1943. Keep.
 4. Chart: Shreveport & Houston Districts compared. — Final report, Feb. 24, 1943. Return
 5. Gulf Oil Correlation Chart, 4/6/41 Return
 6. Progress Rept. S. La. G. S. Corr. Comm. 1944-45 Return
- The above seems to be all the significant material except what was published. None of these charts was published, as I recall, unless the La. Society published theirs. The Mississippi chart was published by Tom McGlothlin and the Applins published theirs.

This material is part of my permanent file and I would like to keep it intact. However, I will not need it for some time and I am glad to have you use it a reasonable length of time.

Regards,

W. Armstrong

W. Armstrong Price.

P.S. All of this stuff was part of former annual reports of the committee to John Bartrum and his successor — Morgan.
