UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY
WASHINGTON

Dr. H. B. Stenzel,
c/o Bu. of Economic Geology,
Austin, Tex.

JAN 13 1939

My dear Dr. Stenzel:

In response to your recent communication:

I have directed that a copy each of Professional Papers 188 and 193-A and Bulletin 909-A be sent to you through the Office of the Superintendent of Documents. These have been withdrawn from the small stocks reserved for official and special uses.

Several copies of Bulletin 896, Lexicon of Geologic Names of the United States, have already been sent to the Bureau of Economic Geology. Because the Survey's own edition is small and was obtained essentially for official use, it is suggested that additional or personal copies be obtained by purchase from the Superintendent of Documents, Government Printing Office, this city, price \$2.50 for the two volumes.

Cordially yours,

Director.
