THE GEOLOGICAL SOCIETY OF AMERICA

419 WEST 117TH STREET, NEW YORK

February 16, 1934.

Prof. H. B. Stenzel,
Agricultural & Mechanical College,
College Station, Texas.

Dear Professor Stenzel:

This will acknowledge the receipt of your letter of February 12 and the manuscript "Aturias from the Eocene of Texas and Alabama," offered for publication in the Bulletin. Before handling the paper further we need to know when the title was read. Your letter mentioned that it had been given before the Geological Society, but I do not find the title on the program of the 1933 annual meeting or of the two preceding meetings. Was there some special arrangement made for its inclusion in one of these programs?

Very truly yours,

(Mrs.) Miriam J. Howells

Assistant to the Secretary
