Dr. R. Sayer
Museum National d'Histoire Naturelle
61, Rue de Buffon
Paris, France

Dear Doctor Sayer:

Please accept my thanks, belatedly, for your kind letter of February 26. The "Fossiles Tertiaires du Bassin de Paris" arrived safely and is a most useful compendium of information. Maurice Cossmann's stratigraphic information in his various publications seemed to me to be too generalized, and your book exactly fills this gap. Your book is going to help me considerably in my work.

The book by L. et J. Morrelet, which you so kindly announced in February, has never arrived, and it seems it was lost in the mail. I had waited for it to show up before answering your letter, but it seems useless to wait any longer.

By separate mail I am sending you a copy of one of my recent papers.

With best wishes for the New Year,

Sincerely yours,

H. B. STENZEL
Geologist
