UT students help develop app to assist students returning to campus

The app, called Protect Texas Together, will allow students, faculty, and staff track their symptoms, record COVID-19 test results, get connected to medical resources, and assist with contact tracing.

AUSTIN, Texas - As UT students prepare to go back to school this fall during the COVID-19 pandemic, an app developed by students and Dell Medical School is looking to make that process run a little more smoothly.

The app, called Protect Texas Together, will allow students, faculty, and staff track their symptoms, record COVID-19 test results, get connected to medical resources, and assist with contact tracing.
