Dr. H. B. Stenzel  
Bureau of Economic Geology  
University of Texas  
Austin, Texas

Dear Dr. Stenzel:

I enjoyed my all too brief visit with you in Denver and wish there had been an opportunity to talk further with you.

Sometime ago we sent you a copy of our 7th Annual Ecological Report, and we are now assembling material for the 8th. It is expected that this 8th report will be mimeographed this summer, and thus get the Committee back on schedule.

This year we are making the last of the assignments on the annotated bibliography of paleoecology, and are hoping that some of the units previously assigned will be completed so that they may be included in the annual report as additional guides to other workers. In your case you will remember that you contracted to furnish an annotated bibliography on the Nautiloid Cephalopods, and one on the Tertiary of Texas (exclusive of the Eocene of the Rio Grande Embayment). If you could complete one of these assignments by August 1, we would like very much to include it in this year's report. Any other material that is suitable for the report would, of course, be most welcome.

I have just had a letter from Gordon Gunter in which he mentions a recent meeting with you which he found very enjoyable and profitable.

With best regards,

Sincerely yours,

*Harry S. Ladd*
