

1180 Russell Ave,
Lodi, Calif.

Nov. 2, 1961

Dear Henryk:

Ray, Jane, and Max are in our midst and Ray is hanging his hat at Stanford and also doing some consulting. I wish I had a small percentage of his vigour.

In talking with Ray I learned you volunteered to join the Swatchy relief fund. If I was told, it did not register. I am much indebted to you, Mark and Ray for the kind proffer. Thelma appreciated it greatly also.

I am gradually picking up lost ~~straggles~~ threads. Yesterday I ~~uncovered~~ a copy of a letter from Katy Palmer asking me to write a memorial for Chas. Weaver. This came shortly after I caved in. I probably saw it, but have no memory of it. Fortunately this was taken care of for me.

In the P & S setup I theoretically spend half time on the no longer beloved Lodo and half on service work which is more or less company style and therefore no great strain. I'm happy and hope the Survey is.

So far its Eocene, Paleocene, Cret., and Cret. P. I think the last is Cret. for no better reason than I haven't seen it in Eoc.-Paleocen. I fear I can't go look at it which would help.

Jerry continues to improve but I doubt he can face the world yet. He has been commuting to S. F. to take an IBM course. It at least keeps him busy. Jordan doing OK with TV repairs. The grandson visits each Saturday. Now three.

I trust the girls and grandchildren are well.

Wishing you the best

As ever,

Meelo
