

January 23, 1951

Mr. W. J. Murray, Jr., Commissioner,
State Railroad Commission
Austin, Texas

Dear Mr. Murray :

Mr. Louis Gimbrede has been a student of geology at The University of Texas and has just now received his M. A. He has worked under my supervision and is well known to me.

Mr. Gimbrede has a very good and likable personality. He makes friends easily and works well with others. His preparation has been unusual in that he has had considerable previous experience in oil company work in subsurface geology. He has made a good showing at the University and finished a good thesis. I believe he is very well prepared for subsurface geology and related fields. I wish to recommend him to your most serious consideration.

Sincerely yours,

H. B. Stenzel, Geologist
Professor of Geology
