Dr. H. K. Elias
The University of Nebraska
Lincoln 8, Nebraska

Dear Dr. Elias:

Please accept my thanks for the specimens of Caulostrepsis dumbari which arrived safely, and the separate of the Stenostoma paper.

By separate mail you will receive a copy of one of the papers in which Polydora is treated. The other paper is still in the press. The Caulostrepsis burrows are so similar to Polydora burrows that I feel that it is not advisable to use separate generic names.

Many thanks for your kind cooperation.

Sincerely yours,

H. B. Stensel
