Preface-----	ix
Organizing/Advisory Committee-----	x
<i>Process Development</i>	
Direct Laser Fabrication of a Gas Turbine Engine Component- Microstructure and Properties (Part I and II) <i>Suman Das^a, Timothy P. Fuesting^b, Gregory Danyo^a, Lawrence E. Brown^b, Joseph J. Beaman^a, David L. Bourell^a, Kathleen Sargent^c, ^cThe University of Texas at Austin, ^bAllison Engine Company, ^cWright Laboratories-----</i>	1
Geometry Processing for SLS/HIP <i>Ravi Venkataramani, Suman Das, Joseph J. Beaman, The University of Texas at Austin -----</i>	19
Surface Finishing of Selective Laser Sintering Parts with Robot <i>Dongping Shi, Ian Gibson, University of Hong Kong-----</i>	27
Laser Polishing of Silica Rods <i>Hongyun Wang, David Bourell, Joseph J. Beaman, The University of Texas at Austin -----</i>	37
Enhanced Controlling of the SLS Process During a Build <i>Alexandre L. Papadatos, Kenneth Stanley Jr., Said Ahzi, Frank W. Paul, Clemson University-----</i>	47
Process Control of 3D Welding as a Droplet-Based Rapid Prototyping Technique <i>R. Kovacevic^a, H. Beardsley^b, ^aSouthern Methodist University, ^bUniversity of Kentucky-----</i>	57
Study of Ejection Forces in the AIM™ Process <i>Neil Hopkinson, Phil Dickens, De Montfort University -----</i>	65
Thermal Behavior of Parts Made by Direct Metal Laser Sintering <i>N. P. Karapatis, Y. Guidoux, P. E. Gyax, R. Glardon, Swiss Federal Institute of Technology-----</i>	79
Thermal Behavior in the LENS Process <i>M. L. Griffith, M. E. Schlienger, L. D. Harwell, M. S. Oliver, M. D. Baldwin, M. T. Ensz, J. E. Smugeresky, M. Essien, J. Brooks, C. V. Robino, W. H. Hofmeister, M. J. Wert, D. V. Nelson, Sandia National Labs-----</i>	89
Prototyping Large-Sized Objects Using Freeform Thick Layers of Plastic Foam <i>A. F. Lennings, J. J. Broek, I. Horváth, A. de Smit, J. S. M. Vergeest, Delft University of Technology-----</i>	97
Direct Rapid Prototyping of Tools <i>K. P. Karunakaran^a, P. Vivekananda Shanmuganathan^a, Sabine Roth-Koch^b, Kai Uwe Koch^b, ^aIndian Institute of Technology Bombay, ^bFraunhofer Institut Produktionstechnik und Automatisierung-----</i>	105

Real Time Video Microscopy for the Fused Deposition Method <i>Evan Bossett, Lorna Rivera, Dan Qui, Ryan McCuiston, Noshir Langrana, Sriram Rangarajan, Natesan Venkataraman, Stephen Danforth, Ahmad Safari, Rutgers, The State University of New Jersey</i> -----	113
Bevel Cutting Methods and Cutting Trajectory Control for Steel Laminations Used in Tooling <i>Daniel F. Walczyk, Rensselaer Polytechnic Institute</i> -----	121
Designing Conformal Cooling Channels for Tooling <i>Xiaorong Xu, Emanuel Sachs, Samuel Allen, Michael Cima, Massachusetts Institute of Technology</i> -----	131
Investigation of Short Pulse Nd: YAG Laser Interaction with Stainless Steel Powder Beds <i>W. O'Neill, C.J. Sutcliffe, R. Morgan, K.K.B. Hon, University of Liverpool</i> -----	147
EFAB: Batch Production of Functional, Fully-Dense Metal Parts with Micron-Scale Features <i>Adam Cohen, Gang Zhang, Fan-Gang Tseng, Florian Mansfeld, Uri Frodis, Peter Will, University of Southern California</i> -----	161
Powder Deposition and Sintering for a Two-Powder Approach to Solid Freeform Fabrication <i>Ashok V. Kumar, University of Florida</i> -----	169
Effective Mechanisms of Multiple LED Photographic Curing <i>Kai Loose, Toshiki Niino, Takeo Nakagawa, University of Tokyo</i> -----	177
Rapid Freezing Prototyping with Water <i>Wei Zhang^a, Ming C. Leu^a, Zhiming Ji^a, Yongnian Yan^b, ^aNew Jersey Institute of Technology, ^bTsinghua University</i> -----	185
Reducing the Surface Deviation of Stereolithography Using an Alternative Build Strategy <i>P. E. Reeves^a, R. C. Cobb^b, ^aDe Montfort University, ^bThe University of Nottingham</i> -----	193
Sacrificial Materials for the Fabrication of Complex Geometries With Lens <i>E. Schlienger, M. Griffith, M. Oliver, J. A. Romero, J. Smugeresky, Sandia National Labs</i> -----	205
Rapid Prototyping Based on 2D Photographic Images <i>Jianguo Wang^a, Y.S. Wong^a, Jerry Fuh^a, H.T. Loh^a, ZhaoHui Du^b, GuoDong Hong^b, YongNian Yan^b, ^aNational University of Singapore, ^bTsinghua University</i> -----	211
Art to Engineering: Pervasive RP Activities at Arizona State University <i>Anshuman Razdan, Mark R. Henderson, Dan Collins, Arizona State University/PRISM</i> -----	221
Solid Freeform Fabrication Research in Engineering Education <i>R. S. Crockett, V. R. Gervasi, Milwaukee School of Engineering</i> -----	229

Computational Modeling

Parametric Based Controller for Rapid Prototyping Applications <i>Georges Fadel, Ravi Ganti, Clemson University</i> -----	236
Process Planning and Automation for Additive-Subtractive Solid Freeform Fabrication <i>J. Miguel Pinilla, Ju-Hsien Kao, Fritz B. Prinz, Stanford University</i> -----	245
Modeling and Designing Components with Locally Controlled Composition <i>Todd R. Jackson, Nicholas M. Patrikalakis, Emanuel M. Sachs, Michael J. Cima, MIT</i> -----	259
Domain Decomposition and Space Filling Curves in Toolpath Planning and Generation <i>Bertoldi M., Yardimci M. A., Pistor C. M., Guceri S. I., University of Illinois at Chicago</i> -----	267
Reverse Engineering Trimmed NURB Surfaces From Laser Scanned Data <i>Ben Steinberg, Anshuman Razdan, Gerald Farin, Arizona State University</i> -----	277
Stereometric Design for Desk-Top SFF Fabrication <i>Zbigniew M. Bzymek, Scott Theis, Tariq Manzur, Chandra Roychaudhuri, Lianchao Sun, Leon L. Shaw, University of Connecticut at Storrs</i> -----	285
A Process Planning Method and Data Format for Achieving Tolerances in Stereolithography <i>Charity M. Lynn, Aaron West, David W. Rosen, Georgia Institute of Technology</i> -----	293
Dimensional Issues in Stereolithography <i>David L. Winnill, David M. Hoopes, Suresh S. Jayanthi, DuPont Somos</i> -----	303
Variable Thickness Ruled Edge Slice Generation and Three-Dimensional Graphical Error Visualization <i>Peter B. Chamberlain, Mark D. Van Roosendaal, Charles L. Thomas, University of Utah</i> -----	311
Topology Driven Improvement of FDC Build Parameters <i>Vikram R. Jamalabad, Jeffrey A. Chard, Charles Gasdaska, Richard B. Clancy, AlliedSignal Research & Technology</i> -----	319
A Visual Tool to Improve Layered Manufacturing Part Quality <i>Gautham Kattethota, Mark Henderson, Arizona State University</i> -----	327
Machine Design, Control and Performance of Automated Computer-Aided Manufacturing of Laminated Engineering Materials <i>Brian B. Mathewson^a, Ravi Hebbar^b, Sangeun Choi^b, Wyatt S. Newman^b, James D. Cawley^b, Arthur H. Heuer^b, ^aCAM-LEM, Inc., ^bCase Western Reserve University</i> -----	335
Build Time Estimations for Large Scale Modelling <i>G. Mensing, I. Gibson, University of Hong Kong</i> -----	343
Reverse Engineering of Polymeric Solid Models Using Refractive Index Matching (RIM) <i>Jon Christensen, Amit Bandyopadhyay, Washington State University</i> -----	351

Software Development for Laser Engineered Net Shaping <i>M. T. Ensz, M. L. Griffith, L. D. Harwell, Sandia National Labs</i>	359
----------------------------------------------------------------------------------------------------------------------------------------	-----

Physical Modeling

Measurement and Modeling Of Residual Stress-Induced Warping in Direct Metal Deposition Processes <i>N. W. Klingbeil, J. L. Beuth, R. K. Chin, C. H. Amon, Carnegie Mellon University</i>	367
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

FDM Systems and Local Adaptive Slicing <i>Justin Tyberg, Jan Helge Bøhn, Virginia Tech</i>	375
------------------------------------------------------------------------------------------------------	-----

Virtual Design and Fabrication in Layered Manufacturing <i>Kathryn B. Higgins, Noshir A. Langrana, Rutgers, The State University of New Jersey</i>	383
--------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Influence of Rheology on Deposition Behavior of Ceramic Pastes in Direct Fabrication Systems <i>Bruce H. King, Sherry L. Morissette, Hugh Denham, Joseph Cesarano, III, Duane Dimos, Sandia National Laboratories</i>	391
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

A Theoretical Model for Optimization of SALD Parameters <i>Zbigniew M. Bzymek^a, Leon L. Shaw^a, Wojciech Marks^b, ^aUniversity of Connecticut, ^bInst. of Fundamental Technical Problems-PAS</i>	399
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Simulation of Laminated Object Manufacturing (LOM) with Variation of Process Parameters <i>Lawrance Flach, Michelle A. Jacobs, Donald A. Klosterman, Richard P. Chartoff, University of Dayton</i>	407
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Dimensional Variability Analysis in Post-Processing of Rapid Tooling <i>Wanlong Wang, James G. Conley, Henry W. Stoll, Northwestern University</i>	417
--------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Shell Cracking in Investment Casting with Laser Stereolithography Patterns <i>W. L. Yao, Ming C. Leu, New Jersey Institute of Technology</i>	427
--------------------------------------------------------------------------------------------------------------------------------------------------------	-----

2-D Wavelet Analysis of Solid Objects: Applications in Layered Manufacturing <i>Mark D. Van Roosendaal, Peter Chamberlain, CharlesL. Thomas, University of Utah</i>	435
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Materials

Strength of the DTM RapidSteel 1.0 Material <i>T. D. Stewart, K. W. Dalgarno, T.H.C. Childs, J. Perkins, The University of Leeds</i>	443
------------------------------------------------------------------------------------------------------------------------------------------------	-----

Direct Injection Molding Tooling Inserts from the SLS Process with Copper Polyamide <i>Christian Nelson, Jason Kepler, Rick Booth, Phillip Conner, DTM Corporation</i>	451
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Rapid Steel Tooling via Solid Freeform Fabrication <i>Timothy J. Weaver, Julian A. Thomas, Sundar V. Atre, Randall M. German, Pennsylvania State University</i>	461
Processing of Titanium Net Shapes by SLS/HIP <i>Suman Das, Martin Wohler, Joseph J. Beaman, David L. Bourell, The University of Texas at Austin</i>	469
Feasibility of Fabricating Metal Parts from 17-4PH Stainless Steel Powder <i>Guohua Wu, Noshir Langrana, Sriram Rangarajan, Rajendra Sadangi, Ahmad Safari, Stephen C. Danforth, Rutgers, The State University of New Jersey</i>	479
Industrial Use of Direct Metal Laser Sintering <i>Olli Nyrhila, Juha Kotila, Jan-Erik Lind, Tatu Syvanen, Electrolux Rapid Development</i>	487
3D Welding and Milling for Direct Prototyping of Metallic Parts <i>Yong-Ak Song^a, Sehyung Park^a, Kyunghyun Hwang^b, Doosun Choi^b, Haeseong Jee^c, ^aKorea Institute of Science & Technology, ^bKorea Institute of Machinery and Metals, ^cHongik University</i>	495
Materials Issues in Laminated Object Manufacturing of Powder-Based Systems <i>J. D. Cawley, Z. Liu, J. Mou, A. H. Heuer, Case Western Reserve University</i>	503
Issues Associated with the Development of a Water Soluble Support Material for Use in Extrusion Freeforming & Fused Deposition Modelling <i>John L. Lombardi^a, Gregory J. Artz^a, Dragan Popovich^a, Ranji Vaidyanathan^a, Sajiv Boggavarapu^b, ^aAdvanced Ceramics Research Inc., ^bUniversity of Arizona</i>	511
Thermal-Expansion and Fracture Toughness Properties of Parts made from Liquid Crystal Stereolithography Resins <i>J. S. Ullett^a, T. Benson-Tolle^c, J. W. Schultz^b, R. P. Chartoff^a, ^aUniversity of Dayton, ^bGeorgia Tech Research Institute, ^cUnited States Air Force - Materials Directorate</i>	519
Rapid Prototyping of Functional Three-Dimensional Microsolenoids and Electromagnets by High-Pressure Laser Chemical Vapor Deposition <i>J. Maxwell^a, K. Larsson^a, M. Boman^a, P. Hooge^b, Kirk Williams^b, P. Coane^b, Uppsala University, ^bLouisiana Tech University</i>	529
Gas-Phase Selective Area Laser Deposition (SALD) Joining of SiC Tubes with SiC Filler Material <i>S. Harrison, H. L. Marcus, University of Connecticut at Storrs</i>	537
Preparation and Properties of In-Situ Devices Using the SALD and SALDVI Techniques <i>James E. Crocker, Lianchao Sun, Leon L. Shaw, Harris L. Marcus, University of Connecticut at Storrs</i>	543

Temperature Dependent Optical Properties of Polymers as a Basis for Laser Process Modeling <i>Bernd Keller, Rolf Pfeifer, Wei-Nien Su, Peter Eyerer, Inst. of Polymer Testing & Polymer Science</i> -----	549
Mechanical Characterization of Parts Processed via Fused Deposition <i>Bertoldi M., Yardimci M. A., Pistor C. M., Guceri S. I., Sala G., University of Illinois at Chicago</i> -----	557
Material Strength in Polymer Shape Deposition Manufacturing <i>J. W. Kietzman, F. B. Prinz, Stanford University</i> -----	567
Rapid Prototyping of Titanium Nitride Using Three-Dimensional Laser Chemical Vapor Deposition <i>James Maxwell, Jubin Shah, Terry Webster, Jason Mock, Louisiana Tech University</i> -----	575
 <i>Ceramic Materials</i>	
Si/SiC-Ceramic – Low Process Shrinkage - High Temperature Material for the Laser Sinter Process <i>Peter Stierlen^a, Peter Schanz^b, Peter Eyerer^a, ^aInst. for Polymer Testing & Polymer Science, ^bDLR</i> -----	581
Mechanical Behavior of Robocast Alumina <i>Hugh B. Denham^a, Joe Cesarano III^a, Bruce H. King^a, Paul Calvert^b, ^aSandia National Laboratories, ^bUniversity of Arizona</i> -----	589
Titanium Casting Molds via Selective Laser Sintering <i>Nicole Harlan, David Bourell, Joe Beaman, The University of Texas at Austin</i> -----	597
Selective Laser Sintering of Zirconium Silicate <i>F. Klocke, H. Wirtz, Fraunhofer Inst. of Production Technology</i> -----	605
Development of a Binder Formulation for Fused Deposition of Ceramics <i>Thomas F. McNulty, Ivan Cornejo, Farhad Mohammadi, Stephen C. Danforth, Ahmad Safari, Rutgers, The State University of New Jersey</i> -----	613
Materials for Biomedical Applications <i>N. K. Vail^a, L. D. Swain^a, W. C. Fox^a, T. B. Aufdemorte^b, G. Lee^c, J. W. Barlow^c, ^aBioMedical Enterprises, Inc., ^b University of Texas Health Science Center at San Antonio, ^cUniversity of Texas at Austin</i> -----	621
Processing of Bioceramic Implants via Fused Deposition Process <i>Susmita Bose, Marisol Avila, Amit Bandyopadhyay, Washington State University</i> -----	629
Automated Fabrication of Nonresorbable Bone Implants Using Laminated Object Manufacturing (LOM) <i>Cheri Steidle, Don Klosterman, Nora Osborne, George Graves, Richard Chartoff, University of Dayton</i> -----	437
Generation of Porous Structures Using Fused Deposition <i>Bertoldi M^a, Yardimci^a M. A., Pistor^a C. M., Guceri S. I^a, Danforth S. C^b, ^aUniversity of Illinois at Chicago, ^bRutgers, The State University of New Jersey</i> -----	639

A Study on Weight Loss Rate Controlled Binder Removal from Parts Produced by FDC <i>Senol Pekin^a, John Bukowski^a, Avigdor Zangvil^a, ^aUniversity of Illinois at U-C, ^bArgonne National Laboratory</i> -----	651
Binder Formulation in EVA-wax System for Fused Deposition of Ceramics <i>Senol Pekin^a, Avigdor Zangvil^a, William Ellingson^b, ^aUniversity of Illinois at U-C, ^bArgonne National Laboratory</i> -----	661
Curved Layer LOM of Ceramics and Composites <i>Donald A. Klosterman^a, Richard P. Chartoff^a, Nora R. Osborne^a, George A. Graves^a, Allan Lightman^a, Gyoowan Han^a, Akos Bezeredi^a, Stan Rodrigues^a, Sung Pak^b, Gary Kalmanovich^b, Leon Dodin^b, Song Tu^b, ^aUniversity of Dayton, ^bHelisys, Inc.</i> -----	671
 Multiple Materials	
Virtual Simulation for Multi-material LM Process <i>Dan Qiu, Noshir A. Langrana, Stephen C. Danforth, Ahmad Safari, Mohson Jafari, Rutgers, The State University of New Jersey</i> -----	681
Features in Layered Manufacturing of Heterogeneous Objects <i>Xiaoping Qian, Debasish Dutta, University of Michigan</i> -----	689
Recent Developments in Robocasting of Ceramics and Multimaterial Deposition <i>Joseph Cesarano III, Bruce H. King, Hugh B. Denham, Sandia National Laboratories</i> -----	697
Functionally Optimized Ceramic Structures <i>C. Gaskaska^a, R. Clancy^a, M. Ortiz^a, V. Jamalabad^a, Anil Virkar^b, Dragan Popovitch^c, ^aAlliedSignal, Inc., ^bUniversity of Utah, ^cUniversity of Tucson</i> -----	705
Fabrication of Curved Ceramic/Polymer Composite Transducers for Ultrasonic Imaging Applications by Fused Deposition of Ceramics <i>G. M. Lous, I. A. Cornejo, T. F. McNulty, A. Safari, S. C. Danforth, Rutgers, The State University of New Jersey</i> -----	713
Automated Fabrication of Complex Molded Parts Using Mold SDM <i>A. G. Cooper¹, S. Kang¹, J. W. Kietzman¹, F. B. Prinz¹, J. L. Lombardi², L. Weiss³, ¹Stanford University, ²University of Tucson, ³Carnegie Mellon University</i> -----	721
Composites With Gradient Properties from Solid Freeform Fabrication <i>V. R. Gervasi, R. S. Crockett, Milwaukee School of Engineering</i> -----	789
Properties of a High Temperature Liquid Crystal Stereolithography Resin <i>R. P. Chartof^a, J. W. Schultz^b, J. Bhatt^c, J. S. Ullett^a, ^aUniversity of Dayton, ^bGeorgia Tech Research Institute, ^cPolaroid Corporation</i> -----	737

**Net Shape Fabrication of SiC and SiC/SiC Components Using
Laminated Object Manufacturing (LOM)**

*Don Klosterman, Richard Chartoff, Nora Osborne, George Graves, Allan
Lightman, Akos Bezeredi, University of Dayton*-----
