Dear Henryk:

A note from Ray suggests you have been sabotaged in your effort to make something of the Houston U. Biology dept..

If so and they are paying you a decent salary, relax and enjoy it. Put it down to human nature and let it go at that. There's no use bating your head against the wall.

Things are not as I like them in the Linney but as I do not wish the pret of consulting, which would be my only out, I drift with the tide and give them 40 hrs. They got many more when I was on the Lodo. So I sublimate in the garden. So what? There probably is no perfect job 'tho I had it good while I try was with United Nav.

The rains refuse to show up. Maybe Texa has annexed us.

Try and put aside your disappointment and enjoy yourself and your family.

Best wishes,  
Merle
